The Board of Education and administration have arrived at a budget that we believe balances the need for quality education with the fiscal constraints on our community. The 2019-20 school year has continued to take our responsibility to direct residents seriously as we develop the annual school budget. The final goal for the 2019-20 Budget is a new field:

- To maintain quality school programs and services for our students to learn, grow, and excel.
- To provide tax payers with a reasonable tax levy increase that supports these student programs and services.

The budget process was a year-long task that was complicated due to the received a $1,400,000 state aid increase as a result of the Educational Opportunity Act. This increase is based on New York State’s fiscal stress rating and provides over $300 per student for the district’s instructional budget.

We are very excited to share with our community all of the growth that our children have experienced. We would like to thank all of our community members for their continued support, and especially our parents for their collaboration and involvement. Together, we can ensure that our children are provided with the best possible education.
